IGELU 2019

Understanding user behaviour when requesting resources

Jessie Donaghey

Digital Services Librarian

Bond University, Australia

OUR GOAL

Assess our service

Analytics to help appreciate where we have come from and use evidence to support where we are going.

Simplify and promote mechanisms for staff and students to request resources that they cannot find in Library Search

Understand our users

Survey requesters to discover preferences, motivations and experiences.

Assess our service

Analytics to help appreciate
where we have come from
and use evidence to support
where we are going.

RESOURCE SHARING TIMELINE UNTIL 2015

Requesting

- Manual online form.
- Every request required the user to enter their identifying information.
- Prone to typos/errors.
- Wasn't integrated with any library system.

Awareness

- One webpage to request from.
- Most likely had to be referred to service by librarian or colleague.

Processing

- Tasks involved entering data into multiple systems.
- Checking user privileges.
- Manually contacting users.

Monitoring

- User unable to track progress.
- Staff required to enter request details into separate systems and spreadsheets to track progress and use of service.

RESOURCE SHARING TIMELINE UNTIL 2018

Requesting

- Requesting from Primo with metadata pre-populated
- Request connected to patron account in Alma.
- Purchase Requests enabled.

Awareness

- Silent login enabled.
- Increased discoverability of service as requesting can happen from Primo Central Index record.
- Still two extra steps to find service: a) Login to Primo. b) Select 'Expand My Results'.

Processing

- Less manual tasks required by staff.
- Automated communication between library and user.

Monitoring

- User can track progress from My Library Card in Primo.
- Analytics reports to help monitor outstanding requests and track usage of service.

EXPAND MY RESULTS IMPACT

2018 VS 2019

55%

Increase in requests
supplied.

88%

Increase in unique
requesters.

37%

Increase in first time
requesters.

RESOURCE SHARING

TOTAL SUPPLIED REQUESTS

FOUND IT! FREELY AVAILABLE

01

User submits request.

02

Resource Sharing staff check Primo and Google/Google Scholar.

03

Staff finds item in Google Scholar (not in subscription resource).

04

Staff assign the Partner named 'Online Freely Available' and complete request.

05

User receives notification where the item can be found.

Frequency of Resource Sharing use

SURVEY

DISCOVERING THE SERVICE

Recommended by another Bond student or staff member

Recommended by Library staff

I found the request link in Primo

I found information about it on the Bond Library website

Unsure

SURVEY

SUPPLY TIME EXPECTATION

2019

Supply time reality

2,418 journal requests received
with an average supply
time of 3 days.

SURVEY

REASONS FOR USING THE SERVICE

- I required this specific resource
- I couldn't find any other available resources on my topic
- It complemented the resources I'd already found on my topic
- The resource was recommended by someone

SURVEY

REQUEST MONITORING

Did you check for updates on your request through your online Bond My Library account?

Top reasons

1. I wanted to track the progress of my request.
2. I wanted to see whether my request had been received by the Library
3. I wanted to find out how long it would take to receive the resource

SURVEY

MOST IMPORTANT FEATURE

Agreement with ranking

SURVEY FUTURE USE

Essential service

"I'm writing a biography of a musician who has been dead for 22 years, and a lot of the material I need is quite obscure!"

Efficient service

"I was really impressed with the efficiency of the system and very grateful I had access to the source in time to use it in my assignment."

RESOURCE SHARING REFLECTION & NEXT STEPS

User experiences and expectations

- New users inclined to expect longer turnaround time.
- Increase self-discovery of service, less reliance on Librarian recommendation.
- Increase in use of service for resources which compliment sources already found.
- Ease of requesting.

Positive changes

- Alma ISO LADD integration.
- Silent Login for Primo.
- Enabling Expand My Results by default.

Future opportunities

- Unpaywall integration for Primo.
- Turnaround time communication.
- Promotion of request monitoring via My Library account.
- Enhancements to placing multiple requests at once.

THANK YOU
